Sustained therapeutic levels of CBD in blood

Path of Purity - NOW more than ever!

Want to help your Patients but confused by all the CBD choices?

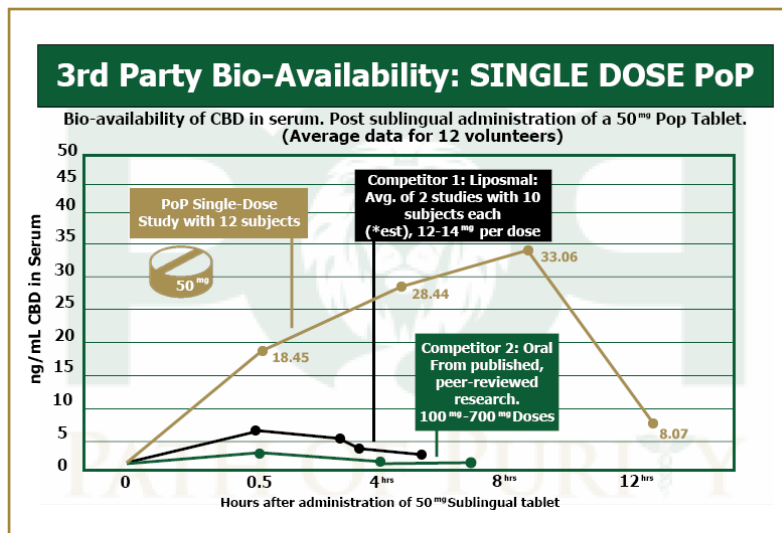

Path of Purity is the World's ONLY dual-release bi-phasic 50mg CBD Tablet - which means the first 25 mg is released in the first 30 minutes, with the second 25mg released 3-6 hours later - when your Patient's [Endocannabinoid System](#) signals the need for more. PoP is made from 100% organic premium Full-Spectrum Phytocannabinoid Rich Hemp Oil for a superior entourage effect. Because each PoP tablet is a measured and metered 50mg, dosing is accurate, discreet, and waste-free. PoP has less-than-point-three-percent (<.3%) Tetrahydrocannabinol is thereby non-psychoactive - but does contain enough THC to create the *full-spectrum entourage effect* as well and take advantage of THC's increasingly-recognized therapeutic benefits. A **Two Month Supply** (60 tablets - 3000mg) **Retails for \$100⁰⁰ and can be purchased Wholesale for \$60⁰⁰ (\$15⁰⁰ shipping per order)**. Path of Purity's Professional Business Model is shared with Participating Practitioners. It is structured to duly reflect your ongoing effort and commitment to Patient Care. There are no signup fees, annual membership dues or monthly PVs to consider.

Path of Purity's Advantages and Performance Data speak for themselves!

We invite you to incorporate Path of Purity into your Care Model to raise Patient Outcomes, create a new revenue stream (that is of great value to Patients) and expand your Practice. As the following links show **Path of Purity is in a class by itself!** [1. PoP Advantages](#)

[2. Brain Mapping](#) shows up to 10 hour effectiveness, as illustrated by data excerpted from 2 studies involving a total of 10 volunteers mapped on 10 brain networks: Information Flow, Coherence, Lagged Coherence, Anxiety, Mood, Pain, Attention Network, Executive Function, Default Mode and Limbic System. **Summary results for the 10 volunteers showed that each participant improved after 30 minutes in each network, with most improving for 3 to 6 hours then leveling off - though some volunteers continued to improve for the full 10 hours (and despite the normal decline in Lagged Coherence typically experienced as we progress through the day).** These results are consistent with the most commonly REPORTED symptomatic changes associated with improving ECS including: reduced Pain and Inflammation, more Energy, better Sleep, less Anxiety plus many other underlying neurological and metabolic improvements.

[3. Unparalleled bioavailability and absorption](#)
